

UX3D receives Seed-Funding from 3D Global Holding and the Unger Group

UX3D becomes part of the 3D Global Holding group to enforce becoming the world's number one provider for autostereoscopic display technology.

Munich, Germany 1. March 2019 - The 3D Global Holding GmbH, technology provider for autostereoscopic displays, today announced its investment into the UX3D GmbH. UX3D is a Germany based solution and middleware provider.

“We are excited of becoming part of the 3D Global Holding group supporting this great autostereoscopic display technology with our know-how in real-time rendering.” says Norbert Nopper, Managing Director of the UX3D.

Autostereoscopic display technology allows real 3D without glasses. Target markets are Computer Games and Movies, but also Automotive and Medicine.

Dr. Hohenstein, Managing Director of the 3D Global Holding: *“Rendering software and know-how is an essential factor for our display technology and we are happy to now have the UX3D team on board”*.

The 3D Global Holding is mainly funded by the Unger Group, having its investment in real estate, environment and technology.

“Adding UX3D to the 3D Global Holding group completes the strategy of having hardware and software autostereoscopic display technology in one place.” says Peter Unger, Head of the Unger Group.

About UX3D

UX3D is a GPU based solution and middleware provider located in Munich, Germany. Founded in 2017, UX3D has international customers and is profitable since day one. Focus is the non-gaming market like automotive or retail industry. Key features of the solutions and upcoming middleware are real-time product visualization and artificial intelligence.

About 3D Global Holding

The 3D Global Holding is the world's top notch technology provider for digital 3D perceptions. 3D Global products are state-of-the-art autostereoscopic 3D displays that provide a unique, direct experience of true 3D viewing or mixed 2D/3D viewing without glasses or other devices. This brings a new quality to gaming, automotive and medical applications such as CRT and MRI imaging.

In 2018 3D Global entered into an exclusive cooperation and distribution agreement with Fujitsu Electronics Europe to make this technology available to customers all over the world.

About Unger Group

In 1985 Peter Unger founded the A.T.U Auto-Teile-Unger GmbH & Co. KG, a car parts company, located in Weiden, Germany. During 2003 – 2004 Peter Unger sold his shareholding of A.T.U to the Investment Companies Doughty Henson and KKR, USA. At that time, A.T.U was one of the most important independent car parts retailers in Europe with an annual turnover of more than 1.4 Billion Euro and more than 350 workshops in Germany, Austria and the Czech Republic.

The Unger Group was founded by Peter Unger in 2004. Main investment areas of the Unger Group are real estate and shareholdings in the environmental and technological area. In the environmental and technological area, the Unger Group takes part in promising companies, dealing with new technologies with a need for capital for future expansion.
